Spectrum – Live your style

We bring a new style to life! The new Spectrum range offers trendy colours, hip textures and exclusive materials that turn your creative ideas into reality. Whether a minimalist look or more with bold accents – with Spectrum you can design your rooms according to your own ideas. A hülsta classic with a new charm.

Unlimited versatility, individuality and combinability

Every room is unique and the furniture should reflect this as well. Spectrum can be individually selected according to your needs and room dimensions, creating customised storage solutions that fit perfectly into your life.

Lists of versions

Front design versions

You can choose between different designs for the fronts and combine them with each other.

<p>Design Plain (A)</p> 	<p>Design Rear-lacquered glass (B) *</p> 	<p>Design Slat (C) **</p> 	<p>Design Glass (D) ***</p> 
--	---	---	--

* Front for Design B: Rear-lacquered glass on base plate

** Front for Design C: Slat with V-joint

*** Front for Design D: Panel made of clear glass or relief glass in lacquered or veneer-coated aluminium frame

Handles for fronts in Design Plain (A)

All fronts in Design Plain (A) are delivered standard without handles (hülsta-Push-to-open). It is however possible to fit fronts with handles (without surcharge). One handle is fitted on each front. The hülsta-Push-to-open device is not fitted when optional handles are included. If drawers are fitted with handles, these are supplied with hülsta-SoftFlow on hidden roller bearings as fully pullout units, with automatic cushioning device. Handles and hülsta-Push-to-open device cannot be combined within one type.
Please state the type number and the required version clearly in the order!

<p>hülsta-Push-to-open Standard</p>  <p>Type GPTO</p>	<p>Handle 057</p>  <p>Pure white lacquer Angora lacquer Anthracite lacquer Come closer lacquer</p> <p>Chrome glossy</p> <p>Type G057 without surcharge</p>

Range introduction

Important notes

Changing versions:

Colour combinations within individual units are possible. In this case please state the version number clearly and separately in the order!

Pricing and calculation:

Suggested combinations and units consisting of several individual units are always offered with carcass in price group I and front in price group I in Design Plain (A); exception: units with glass doors in Design Glass (D), see below. If carcass and/or (individual) fronts in versions of price group II and/or fronts in the Design Rear-lacquered glass (B) or Design Slat (C) are required, a surcharge must be taken into account.

Units in Design Glass (D) in a lacquered aluminium frame are always offered with carcass in price group I and front in clear glass – if applicable with further fronts in Design Plain (A) in price group I. If the aluminium frame is desired with a veneer coating and/or the panel is desired in relief glass, a surcharge must be taken into account.

For types that can be planned individually, price group II is also shown.

Drawings in type list – Cover shelves – Note on the furn plan planning programme

All drawings in the type list are shown with 2.8 cm thick cover shelves in wood/lacquer version.

Cover shelves are essential and must be ordered separately (surcharge).

If types are planned in furn plan, a 2.8 cm thick cover shelf is automatically included. These can be exchanged in furn plan for a 1.0 cm thick cover shelf in wood/lacquer version or a 0.8 cm thick cover shelf made of rear-lacquered glass.

Glass fronts Design Glass (D):

Glass doors with a lacquered aluminium frame (standard) or veneer-coated aluminium frame (surcharge), panel of clear glass (standard) or relief glass (surcharge).

Fitted glass shelves:

Glass shelves behind clear glass fronts are made of clear glass.

Glass cover shelves:

Please be sure to state the required version of the rear-lacquered glass cover shelves in the order!

Standard interior fittings:

Wooden shelves are fitted at intervals of 2 rasters behind wooden doors and glass shelves are fitted behind doors with glass fronts in Design Glass (D).

Drawer frames in standard grey

Wall units:

If units are planned as wall units, a wall bracket must be ordered.

Stacked units:

If units are stacked on top of one another, a wall bracket is only to be ordered for the stacked unit(s) if the stacked unit is wider than the floor unit resp. stacked in an off-set position.

Combinations of floor and wall units:

If floor and wall units are combined within an arrangement, there must not be any skirting boards in the room near the floor units, otherwise they must be removed.

Max. load:

Max. load of wooden and glass shelves (up to 70.4 cm width) as well as drawers: 25 kg

Max. load of wooden and glass shelves (between 70.4 and 105.6 cm width): 15 kg

Max. load of wooden and glass shelves (from 105.6 cm width): 10 kg

Max. load of cover shelves: 35 kg per metre length for floor units.

Please also note any existing maximum load information for individual units which may be stated later, the general load information for wall units as well as the important notes on the quality of walls at the end of this type list.

hülsta-Push-to-open/hülsta-SoftFlow:

Doors, drawers and flaps with hülsta Push-to-open. All drawers on hidden bearings as fully pull-out units. If drawers are fitted with handles, these are supplied with hülsta-SoftFlow on hidden roller bearings as fully pull-out units with automatic cushioned closing device.

Wall fitting

Important notes: Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class (C12/15). For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

Wall units / stacked units

If the 2 and 3 Raster units as well as lowboards are included as wall units, a maximum load per unit of 15 kg per metre must not be exceeded for reasons of stability! Max. load 15 kg per metre:

35.2 cm width: 5.0 kg	140.8 cm width: 20.0 kg
52.8 cm width: 7.5 kg	158.4 cm width: 20.0 kg
70.4 cm width: 10.0 kg	176.0 cm width: 25.0 kg
88.0 cm width: 12.5 kg	193.6 cm width: 25.0 kg
105.6 cm width: 15.0 kg	211.2 cm width: 30.0 kg
123.2 cm width: 15.0 kg	

If the 4 to 10 Raster units, side- or highboards are included as wall units, a maximum load per unit of 40 kg must not be exceeded for reasons of stability!

The wall units can only be fitted on absolutely solid walls. Light masonry is not suitable for this purpose.

For each project please remember to leave a 2.0 cm gap at the top to be able to mount units.

If units are planned as wall units, a wall bracket must be ordered.

If units are stacked on top of one another, a wall bracket is only to be ordered for the stacked unit(s) if the stacked unit is wider than the floor unit resp. stacked in an off-set position.

Labelling in type list drawings / assembly notes for wall units

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of base plates), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= base plates) is required, this is marked in the drawings in the type list with numbers in black boxes. Please be sure to note here the information and notes in the "Wall composition" chapter!

Notes on delivery

Notes on delivery:

Spectrum low-, side- and highboards as well as single units consist of several **component groups** which are **delivered separately** and have to be **assembled on site**. These component groups are the cover shelf and the main carcass resp. the main carcasses.

The fronts of the individual component groups are partially pre-assembled but can be disassembled on site.

Suggested combinations

As an alternative to planning an individual unit from the complete range there is the possibility of choosing from specially suggested combinations. This eases planning. Incorporating accessories can enhance the suggested combinations. These are charged extra.

Flat screen supports

<p>Flat screen support WTL6 The flat screen support can be adjusted 3-dimensionally. It is suitable for flat screens with a screen diagonal of 102-216 cm (40"-85"); max. load: 45 kg. Suitable for Curved TV's. Flat screen support compatible with VESA Norm standard: min.: 200 x 200 mm max.: 600 x 400 mm</p> 	<p>Flat screen support THIN 545, ideally adaptable The flat screen support can be adjusted 3-dimensionally. It is suitable for flat screens with a screen diagonal of 102-165 cm (40"-65") and a maximum depth of 4.5 cm; max. load: 25 kg. Go to www.vogels.com to check if your flat screen can be fitted on this flat screen support. Enter the name THIN 545. After a few steps you can see if your flat screen TV is compatible with the flat screen support. Not suitable for Curved TV's. Flat screen support compatible with VESA Norm standard: min.: 100 x 100 mm max.: 600 x 400 mm</p> 	<p>Flat screen support THIN 515 The flat screen support can be angled up to a max. 15°. It is suitable for flat screens with a screen diagonal of 102-165 cm (40"-65") and a maximum depth of 5.0 cm; max. load: 25 kg. Go to www.vogels.com to check if your flat screen can be fitted on this flat screen support. Enter the name THIN 515. After a few steps you can see if your flat screen TV is compatible with the flat screen support. Not suitable for Curved TV's. Flat screen support compatible with VESA Norm standard: min.: 100 x 100 mm max.: 600 x 400 mm</p>

Important note:
Cover shelves are essential and must be ordered separately (see pages 84-85)!

When used as wall units or stacked units:
Max. load per unit: 40 kg

Notes on delivery:
Please see here the information on range introduction pages.

T

Assembly notes for wall units:
Please be sure to note here the information and notes in the "Wall composition" chapter!

Wall brackets

If units are planned as wall units, a **wall bracket** must be ordered.

If units are stacked on top of one another, a wall bracket is only to be ordered for the stacked unit(s) if the stacked unit is wider than the floor unit resp. stacked in an off-set position.

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

Switch options for lamps: Radio remote control with change of colour temperature

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

The following points must be noted with the radio remote control:

- The receiver must be positioned behind a rear wall or under plinth shelves (at least 20 mm space required under plinth shelves).
- The total wattage power of all lamps included per receiver must not exceed 30 W.
- 4 channels = 4 light groups
- 1 light group = x lights
- All lamps within a light group can be dimmed to the same brightness.
- The change of the colour temperature takes place for all lamps in all light groups.
- The radio remote control is not suitable for equipment operating on 110 V.

Please be sure to note the operating and programming instructions!

4-channel radio remote control with change of color temperature

4-channel radio remote control with change of color temperature

Type	2119	-
------	------	---

Examples of use (schematic diagrams)

Example 1

Lights inside a unit

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps in the open compartment

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 2

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp and the LED light panels in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps and the LED light panels in the centre cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp and the LED light panels in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 3

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamps in the left, centre and right cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the top LED light panels in the left, centre and right cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the bottom LED light panels in the left, centre and right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Important notes

Wall composition / assembly instruction

Important notes:

The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place.

Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete \geq C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

Materials table

with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!
Concrete C12/15 Compression strength \geq 15 N/mm ² 	<div style="display: flex; flex-wrap: wrap;"> <div style="width: 50%;">  <p>Building bricks Mz 12 Compression strength \geq 12 N/mm²</p> </div> <div style="width: 50%;">  <p>Solid blocks of light concrete V2 Compression strength \geq 2 N/mm²</p> </div> <div style="width: 50%;">  <p>Limestone blocks KS 12 Compression strength \geq 12 N/mm²</p> </div> <div style="width: 50%;">  <p>Perforated blocks of light concrete Hbl 2 Compression strength \geq 2 N/mm²</p> </div> <div style="width: 50%;">  <p>Perforated sand lime bricks KSL12 Compression strength \geq 12 N/mm²</p> </div> <div style="width: 50%;">  <p>Aerated concrete PP2 Compression strength \geq 2 N/mm²</p> </div> <div style="width: 50%;">  <p>Vertically perforated bricks HLz 12 Compression strength \geq 12 N/mm² Bulk density \geq 1.0 kg/dm³</p> </div> </div>

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

Mounting sets

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.

3 = 3 support boards

4 = 4 support boards, etc.

One **assembly mortar set** is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.

Important note: Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard trade mastic tool which are the basic essentials for safe and clean workmanship.

Standard set

The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.

Assembly mortar set for up to a maximum of 3 support boards consisting of:

9x injection retaining sleeve
 9x screw-in sleeve
 1x injection cartridge
 2x static mixer
 1x assembly instructions

Please use the mounting screws from the standard set (supplied free of charge).

Example of order:

- Add up number of support boards for all existing unit types
 - Divide the sum by "3"
 - Round up the result to a full number
- = Number of assembly mortar sets required
