Important notes: quality of walls / assembly instruction	63

A country house with a modern look

You can see the craftsmanship and the art of top-class furniture design at a glance. Bring this unmistakable style into your home with Chalera and create a world full of harmony and friendliness. Lots of different versions, sizes, materials and functions create a wide spectrum of possibilities for your own individuality.

Every unit a masterpiece

Chalera units are finished caringly down to the last detail in line with all the rules of traditional carpentry. Anyone looking at Chalera units closely will be amazed at how an impression of simplicity can be achieved by so much intricate workmanship. Even the solid metal handles on the doors and drawers betray the finest quality and are pleasant to feel and use. The feeling of warmth remains even if you prefer a lot of glass on the exterior of the units. Not only your favourite ornaments are shown in the best light by the illuminated cabinet sections.

Feel the highest level of homeliness

No more contradictions in style due to the dimensions. Many different heights, widths and arrangements allow you lots of room for creativity in your own home. Finding the right collector's items for every room in your home – that's Chalera.

List of versions

Version no.	Carcase and front, cover and plinth shelf	Price group
1058	Pure white lacquer	I
1260	Natural oak	II
1529	Core walnut	II

Handles

Drawers and flaps are delivered standard with handle G009 as well as doors and glass doors with handle G008. Drawers with handle with hülsta-SoftFlow on hidden roller bearings as fully pull-out units with automatic cushioned closing device, doors and glass doors with hülsta-SoftClose (door cushioning system). It is however possible to fit fronts without handles (hülsta-Push-to-open; without surcharge). Handles and hülsta-Push-to-open cannot be combined within one unit.

Please state the type number and the required version clearly in the order!

Handle G009
for drawers and flaps

Stainless steel look
Black lacquer

Type G009

Handle G008
for doors and glass doors

Stainless steel look
Black lacquer

Type G008

hülsta-Push-to-open
without handles

Type GPTO

Important notes

Cover and plinth shelves:

Cover and plinth shelves are essential and must be ordered separately.

Glass doors and glass shelves:

Panel of glass doors and fitted glass shelves behind fronts are of clear glass.

Standard interior fittings:

Wooden shelves are fitted at intervals of 2 rasters behind wooden doors and glass shelves are fitted behind glass doors.

Drawer frames

in standard grey

Wall units:

If units are to be included as wall units, a wall bracket must be ordered.

Combinations of floor and wall units:

If floor and wall units are combined within an arrangement, there must not be any skirting boards in the room near the floor units, otherwise they must be removed.

Max. load:

Max. load of wooden and glass shelves (up to 70.4 cm width) as well as drawers: 25 kg

Max. load of wooden and glass shelves (between 70.4 and 105.6 cm width): 15 kg

Max. load of wooden and glass shelves (from 105.6 cm width): 10 kg

Max. load of cover shelves: 35 kg per metre length for floor units.

Please also note any existing maximum load data for individual units which may be stated later and the important notes on the quality of walls at the end of this type list.

hülsta-SoftFlow / hülsta-SoftClose / hülsta-Push-to-open:

Drawers with handle on hidden roller bearings as fully pull-out units with automatic cushioned closing device (hülsta-SoftFlow) as well as doors and glass doors with a door cushioning system (hülsta-SoftClose); fronts optionally without handles (hülsta-Push-to-open).

Wall fitting

Important notes: Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15. For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

Wall units

If 2 and 3 Raster single units / lowboards are included as wall units, a maximum load per unit of 15 kg per metre must not be exceeded for reasons of stability! Max. load 15 kg per metre:

38.6 cm width: 5.0 kg
56.2 cm width: 7.5 kg
73.8 cm width: 10.0 kg
109.0 cm width: 15.0 kg
144.2 cm width: 20.0 kg
179.4 cm width: 25.0 kg
214.6 cm width: 30.0 kg
249.8 cm width: 30.0 kg

If 4-8 Raster single units / sideboards / highboards are included as wall units, a maximum load per unit of 40 kg must not be exceeded for reasons of stability!

The wall units can only be fitted on absolutely solid walls. Light masonry is not suitable for this purpose.

For each project please remember to leave a 2.0 cm gap at the top to be able to mount units.

If units are planned as wall units, a wall bracket must be ordered.

Labelling in type list drawings / assembly notes for wall units

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of base plates), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= base plates) is required, this is marked in the drawings in the type list with numbers in black boxes. Please be sure to note here the information and notes in the "Wall composition" chapter!

Notes on delivery

Notes on delivery:

Chalera single units consist of several **component groups** which are **delivered separately** and have to be **assembled on site**. These component groups are the cover shelf, plinth shelf, fronts and carcase(s).

Possible arrangements

Important note:

Cover and plinth shelves are essential and must be ordered separately.

Cover shelves

Cover shelves

4.5 cm thick;
34.7 or 46.7 cm deep

Cover shelves are essential and must be ordered separately.

The cover shelf protrudes 1.7 cm to the left, right and front of the carcase and is charged in 10 cm lengths or parts thereof.

If several units are planned adjacently, it is possible to fit full-length cover shelves. To make things easier, only the total width of the combination needs to be calculated here. The cover shelves are full-length up to a max. 249.8 cm width.

Price per 10 cm section:

	for 34.7 cm depth	for 46.7 cm depth
Price gr.	3516	3511
I	-	-
II	-	-

Plinth shelves

Plinth shelves

2.9 cm high (4.7 cm high incl. 1.8 cm high plinth adjusters);
34.7 or 46.7 cm deep

Plinth shelves are essential and must be ordered separately.

The plinth shelf is charged in 10 cm lengths or parts thereof.

If several units are planned adjacently, it is possible to fit full-length plinth shelves. To make things easier, only the total width of the combination needs to be calculated here. The plinth shelves are full-length up to a max. 246.4 cm width.

Price per 10 cm section:

	for 34.7 cm depth	for 46.7 cm depth
Price gr.	3518	3519

Media accessories for lowboards

Cable apertures

	Cable aperture K1 silver-coloured; Ø 8.0 cm It is possible to fit a cable aperture in the top shelf of the lowboard. The cable aperture can be made at the rear of the top shelf. The position is in the centre of the compartment, distance from centre of aperture to rear edge of unit: 10.0 cm.	K1 -
	Cable aperture K2 silver-coloured; Ø 8.0 cm It is possible to fit a cable aperture in the rear wall of the lowboard. Positioned in centre of compartment.	K2 -
	Cable aperture K7 silver-coloured; 7.0 x 12.0 cm It is possible to fit a cable aperture in the top shelf of the lowboard. Positioned in centre of compartment, flush with the rear edge of the unit.	K7 -
	Cable aperture K8 silver-coloured; 12.8 x 3.2 cm It is possible to fit a cable aperture in the top shelf of the lowboard. The cable aperture can be made at the rear rim of the top shelf. Positioned in centre of compartment. The cable aperture K8 cannot be fitted above an open compartment.	K8 -
	Cable aperture K9 13.0 x 1.6 cm It is possible to fit a cable aperture in a fitted shelf. The cable aperture can be made at the rear rim of the fitted shelf. Positioned in centre of compartment.	K9 -
	Cable aperture K20 silver-coloured; Ø 8.0 cm It is possible to fit a cable aperture in the partitions of the lowboard. Position: Distance from centre of aperture to rear edge of unit: 10.0 cm.	K20 -

IR repeater set

IR repeater set

Infrared signal transmission set for operating media units behind non-transparent fronts. You can operate all the units in one compartment with one set. The following applies:

- One set must be used in each compartment. 2 transmitters can also be installed in large compartments in order to increase performance. In this case only one additional transmitter needs to be ordered.
- The transmitter must be placed in the direct vicinity of the receiver eye.
- Transmittable IR frequency band 20 – 60 kHz
- Up to 3 transmitters can be combined with one receiver.

It is possible to use 3 transmitters via 1 receiver including Master box. This enables simultaneous operation of 3 different furniture compartments or in critical situations it allows fitting out one furniture compartment with several transmitters in order to increase the performance in this compartment or to operate 2 end units placed next to one another.

The IR repeater set consists of:

- 1 receiver eye (\varnothing 3.0 cm) incl. standing bracket
- 1 electrical transmitter
- 1 plug EVG 12 V
- Cable clips

Please note the details stated in the operating instructions!

IR repeater set
1 receiver eye and 1 transmitter incl. standing bracket

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

DINING

hülsta offers a room concept to meet all requirements in comfort, beauty of form and attractiveness with a comprehensive collection of dining room tables and chairs.

The **dining tables** in a wide variety of sizes (with and without pullout function) in all wood surface versions and in contemporary designs, as well as the **dining chairs** that can be combined individually using different armrests, comfort features, high-grade cover fabrics (leather, textiles) and metal surfaces can all be found in the "**DINING**" type list.

**Coffee tables****Coffee tables**

hülsta offers a comprehensive **collection of coffee tables**, which not only match the hülsta furniture ranges perfectly but can also be combined with other products that are available on the market. You will find these coffee tables in a number of designs, sizes and versions in the "**Coffee tables**" type list.

**Special-sized products****CHALERA**

Special-sized products are possible on request.
Please get in touch with your customer advisor.

Special articles**Individual special-sized products**

If the special-sized product that you require is so unusual that it cannot be illustrated with the many special sized products that we already provide and charge for, then we will quote you the price using a 33 unit type factor. In your order please state for us the relevant enquiry number and the 33 unit type factor stated.

33

Special colours; Note on "Blue Angel" / Emissions label of DGM**Special colours**

All the hülsta lacquer colours are possible for nearly all the hülsta ranges.
Availability and prices on request.

Note on "Blue Angel" (RAL-UZ 38) and Emissions label of DGM (Class A)

It is possible that the requirements of the "Blue Angel" and the DGM Emissions Label cannot be met by some of the lacquer colours in price groups III and IV (see here the different lacquer versions in the NEO range), depending on the colour mix (surface ratio of these colours in the corresponding order). However, the legal requirements are definitely met in all cases!

Switch options for lamps: Radio remote control with change of colour temperature

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

The following points must be noted with the radio remote control:

- The receiver must be positioned behind a rear wall or under plinth shelves (at least 20 mm space required under plinth shelves).
- The total wattage power of all lamps included per receiver must not exceed 30 W.
- 4 channels = 4 light groups
- 1 light group = x lights
- All lamps within a light group can be dimmed to the same brightness.
- The change of the colour temperature takes place for all lamps in all light groups.
- The radio remote control is not suitable for equipment operating on 110 V.

Please be sure to note the operating and programming instructions!

Examples of use (schematic diagrams)

Example 1

Lights inside a unit

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamps in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps in the open compartment

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 2

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp and the LED light panels in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps and the LED light panels in the centre cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp and the LED light panels in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 3

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamps in the left, centre and right cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the top LED light panels in the left, centre and right cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the bottom LED light panels in the left, centre and right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Cable apertures

It is possible to provide the cover shelves, side sections, shelves, etc, in units from nearly all the hülsta living room ranges with cable apertures so it is easier to feed cables of electronic equipment through these units. There are four different types of cable apertures to choose from, as listed here. **Please be sure to follow the important notes.**

Cable aperture K1	Cable aperture K2	Cable aperture K3	Cable aperture K20
<p>Cable aperture for 80 mm hole, silver colour Standard cable aperture; particularly suitable for cover shelves, side sections and shelves</p> <p>Sizes: Assembly height: 21 mm Outside diameter: 92 mm Inside diameter: 74 mm Diameter of hole: 80 mm</p>  <p>K1</p>	<p>Cable aperture for 80 mm hole, silver colour particularly suitable for rear walls and side sections</p> <p>Sizes: Assembly height: 8 mm Outside diameter: 92 mm Inside diameter: 74 mm Diameter of hole: 80 mm</p>  <p>K2</p>	<p>Cable aperture for 60 mm hole, silver colour particularly suitable for shelves and constructional shelves (suitable to an extent for short cables)</p> <p>Sizes: Assembly height: 21 mm Outside diameter: 72 mm Inside diameter: 54 mm Diameter of hole: 60 mm</p>  <p>K3</p>	<p>Cable aperture for 80 mm hole, silver colour particularly suitable for side-panels and centre partitions</p> <p>Sizes: Assembly height: 2x 8 mm Outside diameter: 92 mm Inside diameter: 74 mm Diameter of hole: 80 mm</p>  <p>K20</p>

IMPORTANT NOTES Please be sure to note!

Please be sure to state the **exact position** of the cable aperture in your order (always measure distances from the centre of the cable aperture). For **wall units** the cable aperture is only possible in the bottom position (due to the suspension brackets). With **cover shelves**, the position of the cable aperture is determined in the factory, in accordance with factors specific to the given range. The same applies to technical exceptions because of custom-based planning. The K 20 is positioned in the centre (depthwise) in the **side-panel**. Please state the exact height (centre of hole of cable aperture from bottom rim of side-panel)! Subject to technical progress.

The **minimum distance** for the cable aperture (measured from the inside): 100 mm from the side and 70 mm from the rear (for horizontal surfaces) or 100 mm from the side and 70 mm from the base (for vertical surfaces). Please state if the aperture is to be fitted at the left, at the right or in the centre.

Standard position: If no details of the exact position of the cable aperture are given in your order, the cable aperture is always fitted at the bottom centre or at the rear centre of the relevant surface, whereby the distances stated above still apply.

Caution! Please note that the cable aperture can not be fitted where there is an integrated or front spotlamp, centre partitions or a split rear wall. **Please be sure to observe the following explanatory diagrams!**

for vertical surfaces	for horizontal surfaces
<p>Minimum distance 100 mm from the side and 70 mm from the base</p> 	<p>Minimum distance 100 mm from the side and 70 mm from the rear</p> 
<p>Standard position at the centre of the surface and 70 mm from the base</p> 	<p>Standard position at the centre of the surface and 70 mm from the rear</p> 
<p>Please note! If there is an integrated or front spotlamp in a shelf, for example, the cable aperture cannot be fitted at this position!</p> 	<p>Please note! If there is a centre partition, for example, between two shelves, the cable aperture cannot be fitted at this position!</p> 

Wall composition / assembly instruction

Important notes:

The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place.

Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete \geq C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

Materials table

with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!		
Concrete C12/15 Compression strength \geq 15 N/mm ²		 Building bricks Mz 12 Compression strength \geq 12 N/mm ²	 Solid blocks of light concrete V2 Compression strength \geq 2 N/mm ²
	 Limestone blocks KS 12 Compression strength \geq 12 N/mm ²	 Perforated blocks of light concrete Hbl 2 Compression strength \geq 2 N/mm ²	
	 Perforated sand lime bricks KSL12 Compression strength \geq 12 N/mm ²	 Aerated concrete PP2 Compression strength \geq 2 N/mm ²	
	 Vertically perforated bricks HLz 12 Compression strength \geq 12 N/mm ² Bulk density \geq 1.0 kg/dm ³		

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

Mounting sets

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.

- 3** = 3 support boards
- 4** = 4 support boards, etc.

One **assembly mortar set** is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.

Important note: Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard trade mastic tool which are the basic essentials for safe and clean workmanship.

Standard set

The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.

Assembly mortar set for up to a maximum of 3 support boards consisting of:

9x injection retaining sleeve
9x screw-in sleeve
1x injection cartridge
2x static mixer
1x assembly instructions

Please use the mounting screws from the standard set (supplied free of charge).

Example of order:

- Add up number of support boards for all existing unit types
- Divide the sum by "3"
- Round up the result to a full number
- = Number of assembly mortar sets required
