## Nature meets architecture

The impressive combination of genuine oak natura veneer with architectural influences delivers the distinctive Tantum look. Matt anthracite or pure white lacquered glass fronts are beautiful to the touch and can be perfectly teamed up with the oak wood.

The simplistic shapes draw the eye to the details that make up this bedroom range: Characteristic slat elements are an extraordinary eye-catcher. In keeping with the current trend, the structures inspired by contemporary architecture soften the front look of the storage units. Dovetailed headboards and strong end-grain wood elements within side tables and benches create a wonderfully natural atmosphere. If desired, cleverly upholstered units add restful comfort to this calm room. Tantum plays with the contrast of intricate design and earthy strength. Traditional craftsmanship makes such a design possible.

Wardrobes featuring a movable full-length mirror unit offer individual solutions. The practical wardrobe interior fittings keep the wardrobe tidy. There is a clever storage option for every single item of clothing or accessory.

## Wardrobes

Hinge- and folding-door wardrobes as well as combined hinge-/sliding-door wardrobes according to the endless assembly principle

- Hinge- and folding-door wardrobes as well as combined hinge-/sliding-door wardrobes can be combined with one another
- Hinge- and folding-door wardrobes with optional cornice profile (with LED lamp) and/or top LED lamp (12 V; 3.2 W)
- Extra-wide panorama units of folding-door wardrobes without centre partition
- Combined hinge-/sliding-door wardrobes with optional top LED lamp (12 V; 3.2 W)
- Wardrobe interior carcass in white lacquer (standard) or grey lacquer
- Standard interior fittings: 2 fitted shelves, 1 clothes rod
- Functional and high-quality interior wardrobe fittings (see "Wardrobe interior fittings" type list)

## Beds

- Beds with wooden and upholstered headboard as well as upholstered beds in four widths and three lengths
- Beds with upholstered headboard and upholstered beds in two heights
- Beds with bed arched support and bed clip in pure white lacquer or anthracite structured lacquer
- Upholstery for wooden headboard

In combination with the hülsta Sleeping System, the beds guarantee highest sleeping comfort. With its high-quality spring base frames and mattresses, the hülsta Sleeping System provides the perfect prerequisites for relaxing sleep (see "SLEEPING SYSTEMS" type list).

## Ancillary units

- Wall console in one width and one height, with optional panel and LED panel lamp
- Consoles, stool, chests and high chest in one width and one height each
- Bench, dressing/writing table and valet stand
- Wall shelves and angled shelves, angled shelves with optional LED lamp
- Mirrors
- Pouf

## Quality features

- All wardrobe doors with cushioning bracket
- Wardrobe doors with metal handle and high-quality spring hinges
- Extra-wide fitted wardrobe shelves (160 and 200 cm) of 3-layered quality chipboard
- All metal hinges
- Visually unobtrusive 2.5 mm drilled holes for wardrobes
- Centre partitions and end side-sections of wardrobes with special plinth adjustment
- **hülsta-Push-to-open:** Drawers and hinge-doors of ancillary units with hülsta-Push-to-open device. All drawers on hidden bearings as fully pull-out units
- **hülsta-SoftGlide:** Sliding-doors with pneumatic auto pull-in feature in opening and closing directions
- **hülsta-MagicClose:** All wardrobe doors with door cushioning system

\* The accent versions are only available for chosen drawers. These are specially marked.

# Range introduction

## Wall fitting

**Important notes:** Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15. For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

## Labelling in type list drawings / assembly notes for wall units

**Labelling in type list drawings / assembly notes for wall units**  
The majority of units have two wall mounting points (= number of base plates), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= base plates) is required, this is marked in the drawings in the type list with numbers in black boxes. Please be sure to note here the information and notes in the "Wall composition" chapter!

3  
4

## Notes on delivery

**Notes on delivery:**  
The majority of the units are delivered standard as **fully connected units (glued)** so that the carcass **cannot be disassembled**. There are however some **exceptions** to this rule:

Some carcasses are delivered as complete units but can be **disassembled into individual sections** in the final customer's home. These types are marked with a **1** in the type list.

1

Some carcasses are delivered **in individual sections** because of their size. These types are marked with a **2** in the type list.

2

The fronts with the number **2** are delivered separately and can therefore always be (dis-) assembled.

# Special combinations

Please also note the mattresses and base frames in the “Sleeping systems” type list!

**TANTUM**

Special combinations are arrangements that are reduced in price. This price advantage is only available when the arrangement is ordered exactly as described. The special combinations can be enhanced by including accessories. These are charged extra.

**Special combinations** consisting of a **bed unit** (bed with wooden headboard and bed frame in wood version and two stools) and a **hinge- or folding-door wardrobe**. The price of an entire special combination (bed unit and wardrobe) can be found in the grey shaded boxes!

**Special-sized products for special combinations are possible! Pricing:**  
special combination + 15% plus all the required special-sized products (see „Special-sized products“)!)

**Important:** Choose a bed with wooden headboard and bed frame in wood version (all bed sizes possible – please state type number; see page 13) and two stools (stool type 6041 is possible; see page 18) as well as one of the wardrobes listed below.

Information on the energy class: see page 7 below!

Hinge- and folding-door wardrobes  
and combined hinge-/sliding-door wardrobes

TANTUM

Wardrobes according to the endless assembly principle

Hinge- and folding-door wardrobes and combined hinge-/sliding-door wardrobes can be planned endlessly and combined with one another. Due to the various element widths one can create many total wardrobe widths. In this way the available floor space can be exploited to the full. For each wardrobe combination, the first element on the left is considered to be the basic unit, incorporating both outer side-sections. One can only include one basic unit in each combination. When adding on extension units, the right-hand side-section of the basic unit is employed as the end side-section of the complete combination. In the case of single-door hinge-door units as well as folding-door wardrobes one can choose between left- and right-hand hinges. The graphics shown below give you an excerpt from our wardrobe assortment.

Standard interior fittings per unit: 2 fitted shelves, 1 clothes rod.

Wardrobe interior carcase and interior fittings in white lacquer (standard) or in grey lacquer.

Dimensions  
Hinge- and folding-door wardrobes

	without cornice profile	with cornice profile	with top LED lamp
Heights incl. plinth	229.6 cm	231.6 cm	234.8 cm
Depths	61.4 cm	67.8 cm	71.5 cm
Widths	see pages 8-11		

Examples of wardrobes

6-door hinge- or folding-door wardrobe  
302 cm wide

5-door combined hinge-/sliding-door wardrobe  
4 hinge-doors, 1 sliding-door  
302 cm wide

Hinge- and folding-door wardrobes

- Hinge- and folding-door wardrobes can be planned endlessly and combined with one another
- Cornice profile and lamps at a surcharge
- Extra-wide panorama units in 160/162 and 200/202 cm width without centre partition
- Hinge-door wardrobes:  
Unit outside widths: 42, 52, 82, 102 cm (basic units)  
40, 50, 80, 100 cm (extension units)  
Unit inside widths: 38, 48, 78, 98 cm
- Folding-door wardrobes:  
Unit outside widths: 82, 102, 162, 202 cm (basic units)  
80, 100, 160, 200 cm (extension units)  
Unit inside widths: 78, 98, 158, 198 cm
- Outside depth: 61.4 cm
- Inside depth: 56.0 cm
- Door opening angle: approx. 110°

For calculating the total width when fitting the cornice profile, please note the cornice profile protrusion of 0.3 cm left and right!

Combined hinge-/sliding-door wardrobes

- Description of hinge-doors: see above
- Sliding-door always with a mirror
- Unit outside widths: 162, 182, 202, 242, 282, 302 cm (basic units)  
160, 180, 200, 240, 280, 300 cm (extension units)  
Unit inside widths (behind sliding-door): 78, 98 cm
- Outside depth: 68.4 cm
- Inside depth: 56.0 cm

Lamps

All hinge- and folding-door wardrobes are available with an optional cornice profile and LED lamps or with top LED lamps. One LED light panel (3.2 W) or one top LED lamp (3.2 W) is fitted standard above each unit – 1 or 2 door. Exception: in the case of panorama units two LED light panels or two top LED lamps are fitted. If required, an LED light panel or a top LED lamp can be fitted centrally above each door. Please include a sketch in all cases. The same applies to combined hinge-/sliding-door wardrobes with the exception that no cornice profile can be planned.

Switching is done by an external foot switch. A radio remote control is also available as an alternative, which is charged extra. The radio remote control incorporates one transmitter and one receiver which operate all the LED lamps. The foot switch is omitted when the radio remote control is employed.

Please note: When planning a cornice profile, please note that a distance of at least 7.0 cm to the ceiling must be observed.

Radio remote control

## Note on usable bed inside height:

The support slats of the hülsta beds are delivered in the centre position, i.e. they can be adjusted by 3.2 cm upwards and downwards. If the slats are set in the lowest position, the **maximum usable bed inside height** is achieved.

In the case of some beds, the bed inside height is comparatively low. This means that mattresses in combination with base frames that are somewhat higher are not held so well by the bed side sections. Please note that the usable bed inside height of beds with height adjustable support slats is reduced when these are set higher.

This is how to calculate the individual height from the data supplied with the base frames:

**Example: bed and hülsta flex basic B base frame**  
(back and foot sections adjustable)

**Max. usable bed inside height:**  
18.0 cm

approx. 12.5 cm for holding  
mattress

5.5 cm total height of base frame  
(example: hülsta flex basic B)

## Note on space under bed:

The storage space underneath the base frame is calculated from the bed height minus the usable bed inside height.

Example bed:  $42.2 \text{ cm} - 18.0 \text{ cm} = 24.2 \text{ cm}$ .

Special heights, special widths, special depths

Special heights

- Hinge-, folding- and sliding-door wardrobes can be reduced in height at intervals of 1.0 cm.
- Below eye-level we recommend fitting a top cover shelf made of panelling material.
- Please state in order!
- Special heights in stepped versions (not possible on sliding-door wardrobes) at a surcharge.

Surcharge per step:

00030

-

Special widths

Only applies to hinge- and folding-door wardrobes

- Single-door units, left or right hinges, can be reduced down to 25 cm width (apart from profiled doors).
- Twin-door units can be reduced at both sides down to 50 cm total width (apart from profiled doors).
- Interior fittings such as drawers and other fittings cannot be reduced in width.
- For notes on width reductions on Multi-Forma sliding-door wardrobes please see special-sized products for Multi-Forma.

Special depths

- Depth reductions are made on side sections, plinths, cornices and shelves.
- Interior fittings such as drawers and other fittings cannot be reduced in depth.
- A max. reduction of 30.0 cm is possible on hinge- and folding-door wardrobes.
- A max. reduction of 9.0 cm is possible on profiled hinge-doors.
- For sliding-door wardrobes, a max. reduction of 30.0 cm is possible.
- Please note that for technical production reasons not every special depth can be achieved:  
2.5 cm standard reduction between 0 and 2.5 cm  
5.0 cm standard reduction between 4.5 and 5.0 cm  
27.5 cm standard reduction between 27.0 and 27.5 cm

Notes on calculating sizes of sloping units

Side sloping

Sloping is only possible on single-door units. The door hinge (left or right) is positioned on the taller outer side of the unit.

Measurements required:

- H 1 = Room height
- H 2 = Height of slope (If a space is required between the wall and the wardrobe/unit, please state the exact distance.)
- B 1 = Width of slope
- B 2 = Width of slope
- G = Total width
- S = Wardrobe width

Please note!

- If the slope cuts across the position of a handle, the handle of this door only is positioned further down in production.
- As floors, ceilings and walls are never exactly straight, the exact room size must be measured using a spirit level.
- If a cornice is fitted, please state if this is to be continued in the sloping section.

Rear sloping

Rear sloping is possible on all wardrobe units.

Measurements required:

- H 1 = Room height
- H 2 = Height of slope (If a space is required between the wall and the wardrobe/unit, please state the exact distance.)
- T 1 = Depth of slope
- T 2 = Depth of slope

## TANTUM

## Special articles

## Wardrobes

## Special heights:

Hinge-door/folding-door wing – wood  
Hinge-door/folding-door wing – rear-lacquered glass  
Special heights are not possible on combined hinge-/sliding-door units.

Side sloping is possible up to a minimum height of 128 cm. Side sloping is not possible on folding- and sliding-door units.

## Rear sloping:

Surcharge per unit

99912 -

## Ancillary units

Special sizes are not possible on ancillary units.

## Beds

Bed in special length 190 cm  
Bed with 2 footboards (all-round bed)  
Special sizes are not possible on upholstered beds.

99964 -  
99967 without surcharge

## Special-sized products for special combinations:

Pricing: special combination + 15% plus all the required special-sized products (see above)

## More special-sized products are possible.

Please get in touch with your customer advisor.

## Cover panels

for side and top panelling of fitted wardrobes (support construction and fitting materials must be acquired on site)

Basic price per order 9901 -  
+ price per m<sup>2</sup> in price group I 9908 -  
Veneer match with fronts can not be guaranteed.

## Rim veneer

superimposed ex works or rims lacquered  
for veneer and lacquer versions per m. length  
in price group I

9902 -

## 165° hinges

Wardrobe doors can also be fitted with **165° hinges** against a surcharge (only possible on plain, straight hinge-doors). Please mark the doors clearly in the order!  
Note: Doors with 165° hinges do not have a door cushioning system.

Surcharge for 165° hinges per hinge-door:

180 -

## Individual special-sized products

If the special-sized product that you require is so unusual that it cannot be illustrated with the many special sized products that we already provide and charge for, then we will quote you the price using a 33 unit type factor. In your order please state for us the relevant enquiry number and the 33 unit type factor stated.

33 -

## Special colours; Note on “Blue Angel” / Emissions label of DGM

## Special colours

All the hülsta lacquer colours are possible for nearly all the hülsta ranges.  
Availability and prices on request.

## Note on “Blue Angel” (RAL-UZ 38) and Emissions label of DGM (Class A)

It is possible that the requirements of the “Blue Angel” and the DGM Emissions Label cannot be met by some of the lacquer colours in price groups III and IV (see here the different lacquer versions in the NEO range), depending on the colour mix (surface ratio of these colours in the corresponding order). However, the legal requirements are definitely met in all cases!

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

- The following points must be noted with the radio remote control:**
- The receiver must be positioned behind a rear wall or under plinth shelves (at least 20 mm space required under plinth shelves).
  - The total wattage power of all lamps included per receiver must not exceed 30 W.
  - 4 channels = 4 light groups
  - 1 light group = x lights
  - All lamps within a light group can be dimmed to the same brightness.
  - The change of the colour temperature takes place for all lamps in all light groups.
  - The radio remote control is not suitable for equipment operating on 110 V.
- Please be sure to note the operating and programming instructions!**

## Examples of use (schematic diagrams)

### Example 1

#### Lights inside a unit

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlight in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps in the open compartment

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlight in the right cabinet

#### Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

### Example 2

#### Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlight and the LED light panels in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps and the LED light panels in the centre cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlight and the LED light panels in the right cabinet

#### Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

### Example 3

#### Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamps in the left, centre and right cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the top LED light panels in the left, centre and right cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the bottom LED light panels in the left, centre and right cabinet

#### Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Important notes

Wall composition / assembly instruction

**Important notes:**  
The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place.

Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete  $\geq$  C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

Materials table  
with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!			
Concrete C12/15 Compression strength $\geq$ 15 N/mm <sup>2</sup> 		Building bricks Mz 12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Solid blocks of light concrete V2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Limestone blocks KS 12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Perforated blocks of light concrete Hbl 2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Perforated sand lime bricks KSL12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Aerated concrete PP2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Vertically perforated bricks HLz 12 Compression strength $\geq$ 12 N/mm <sup>2</sup> Bulk density $\geq$ 1.0 kg/dm <sup>3</sup>		

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

Mounting sets

<p><b>Labelling in type list drawings / assembly notes for wall units</b></p> <p>The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.</p> <p><b>3</b> = 3 support boards <b>4</b> = 4 support boards, etc.</p> <p>One <b>assembly mortar set</b> is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.</p> <p><b>Important note:</b> Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard trade mastic tool which are the basic essentials for safe and clean workmanship.</p>		
<p><b>Standard set</b></p> <p>The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.</p>		
<p><b>Assembly mortar set for up to a maximum of 3 support boards consisting of:</b></p> <p>9x injection retaining sleeve 9x screw-in sleeve 1x injection cartridge 2x static mixer 1x assembly instructions</p> <p>Please use the mounting screws from the standard set (supplied free of charge).</p>	<p><b>Example of order:</b></p> <ul style="list-style-type: none"><li>• Add up number of support boards for all existing unit types</li><li>• Divide the sum by “3”</li><li>• Round up the result to a full number</li></ul> <p>= Number of assembly mortar sets required</p>	<p><b>M2</b></p> <p>-</p>
