NEW range

now! mag

A MAGnetic design.

Nothing is fixed but anything is possible at any time. Sounds good, doesn't it? now! mag is a metal wall on which you can arrange magnetic chests and boxes, hooks, shelves and mirrors any way you like by drag-and-drop. In white or in colour, in lines or set at angles, for ever or just for the next hour.

Open for every idea.

Each individual magnetic box can take a load of up to 7 kg. That's more than enough for books or flowers. The straightforward rectangular units come in snow white, saffron yellow, moss green, terra red, petrol blue and velvet grey, rectangular and square.

DE – Care recommendations for now! by hülsta mag

Products from the JEMAKO „Gentle“ kitchen set are perfect for regular care and cleaning. Stubborn dirt on the magnetic wall can be removed using the JEMAKO lemon balm.

The product is available from your JEMAKO dealer, who will be pleased to explain to you how to use it properly.

Your JEMAKO dealer can be found here:

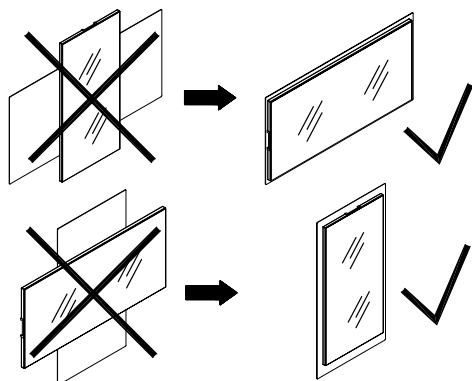

<https://www.jemako.com/de/vertriebspartner-in-ihrer-naehe/>

Important notes

Pacemakers

- Magnets can have an effect on pacemakers and implanted defibrillators.
- If you are a user of such a device you should keep a safe distance from magnets. Warn users of such devices about getting too close to magnets.

Assembly instructions for magnetic mirror

When planning, please remember that the metal modules cannot be placed „crossed over“ because the connection could loosen – so there is a risk of injury.

Please be sure to note the following: „now! general“ chapters on the following subjects:

- Important notes on fitting lamps
- wall units
- maximum loads
- nature of walls/assembly instructions

Important notes: Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class (C12/15). For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

Important note:
Because orders are read out automatically, it is essential that the correct unit type number for the required unit is stated clearly in the order. Please remember this when ordering!

Planning notes

Planning step 1:

- metal modules

metal brackets – a

metal brackets – b

magnetic boxes

Planning step 2:
