NO.14

7/23  
E

[www.now.huelsta.com](http://www.now.huelsta.com)

now! no.14

Friends of good taste love the solid, super adaptable range: basically clear and straightforward, now! no.14 also has a playful, extravagant side and some cleverly integrated features in store.

Planning notes

Lists of versions

System versions

Changing versions:

In now! no.14 colour combinations within individual units are possible (exception: not possible with the accent versions of the assembly unit 8R type 38821 L and 38822 R). In this case please state the versions clearly and separately in the order! **Please state all the versions clearly in the order!**

Example:

- hülsta-MagicClose:** All wooden hinge-doors with hülsta-MagicClose (gentle closing)
- hülsta-SoftFlow:** All drawers with auto pull-in feature with brake as fully pull-out units
- Since 1996, we are entitled to label all of our modular furniture and base frames with the strictly regulated "Blue Angel", which awards products that are low in emissions and especially environmentally friendly.

Please be sure to see the “now! general” chapter on the following subjects:

- Important notes on including lighting
- Remote control unit for LED lamps
- IR repeater set for lowboards
- Cable aperture assembly set
- Flatscreen TV sizes overview
- Flap hinge
- Wall units
- Maximum loads
- Quality of walls / assembly instructions

now! no.14

## Planning notes

### Planning assembly units and sideboards

#### Planning step 1

##### Choice of unit

Note:  
Please state all the versions clearly in the order  
(see here the information on the previous page).

#### Planning step 2

##### Choice of optional cover shelf

in the required version (can only be fitted on top of  
assembly units without a glass bonnet and sideboards)

Note:  
If assembly units are planned adjacently it is possible to  
include a full-length cover shelf.

#### Planning step 3

##### Choice of optional accessories

such as:  
- Glass shelf with LED lamps  
- Plinth

### Planning a lowboard

#### Planning step 1

##### Choice of unit

Note:  
Please state all the versions clearly in the order  
(see here the information on the previous page).

#### Planning step 2

##### Choice of optional cover shelf

in the required version

#### Planning step 3

##### Choice of optional accessories

such as:  
- Glass bonnet  
- Legs (set of 5)  
- Plinth  
- LED light strip

### Planning wall units

#### Planning step 1

##### Choice of unit

Note:  
Please state all the versions clearly in the order  
(see here the information on the previous page).

#### Wall units with door

##### Wall units with door

Please be sure to state the required handle position  
(optionally at the top or at the bottom on the door)  
when ordering wall units with door.

#### Planning step 2

##### Choice of optional accessories

such as:  
- Glass shelf with LED lamps

Carcase versions

- White lacquer
- Silk grey lacquer

Front versions

- High-gloss white lacquer
- High-gloss silk grey lacquer
- Core walnut

Special combinations

Special combinations are arrangements that are reduced in price. This price advantage is only available when the arrangement is ordered exactly as described. The special combinations can be enhanced by including accessories. These are charged extra.

Recommended accessories

Article	Order no.	
1x Glass bonnet for lowboard	3452	-
1x Glass shelf with LED lamps	30040	-

Information on the energy class:  
see the description of the individual units!

Height: approx. 168 cm

Note:  
Cover shelf of the lowboards optionally in wood or glass. Please state the required version clearly in the order!

Article	Special combination
Order no.	990010 / 991010

# Sketch raster for the now! no.14 range

Please superimpose unlined paper and write firmly. In order to avoid slipping, use 2 paper clips or fold the edge of the drawing sheet.

## Check list

- 1.) Do the **sketch** and the **order** match? Do the **dimensions** and the **sketch** match the type number? Are all **type numbers** correctly stated in the sketch? Can one see the position of **door hinges**?
- 2.) Are all **type numbers** correct? Have you perhaps confused **price** and **type numbers**?
- 3.) In combinations of **wooden, lacquer and high-gloss lacquer versions**: is it clear which units are to be delivered in which version?
- 4.) Are all **accessories** such as fitted glass shelves with lamps (later assembly not possible) etc. included in the sketch?
- 5.) Is this an **additional order**? If so, when was the **original order**? If possible, include a sketch on which the existing and new units are clearly marked.

Please also remember the planning notes on the introductory pages!

	Dims. in cm	Raster		35	70	105	140	175	210	245	280
Assembly unit	153.6	8									
Assembly unit, sideboard	76.8	4									
Lowboard	38.4	2									
Lowboard	22.4	1									
Legs	16.0										
Plinth	4.5										
Legs	1.8										

	Base sketch	Scale 1 : 25
52		
39.7/42		
31.7/34		

## Important note!

Please do not forget to include the following details with each order. This avoids time-consuming correspondence and unnecessary delays in delivery.

Version(s)	Customer	Date	Commission
------------	----------	------	------------

## Important notes on including lighting

In all now! ranges lighting with manual switches may only be included **on furniture units** (e.g. the top LED lamp for wardrobes) or **in open compartments, open carcasses or behind clear glass fronts or fronts with a clear glass panel** (e.g. the light strip with LED lamps). **It is not possible to include lighting behind non-transparent fronts (e.g. wood, lacquer, high-gloss fronts or fully rear-lacquered glass fronts).**

## Remote control set

### Radio remote control set

The lamps are normally operated by an external foot switch. A radio remote control is also available as an alternative, which is charged extra. The radio remote control consists of one transmitter and one receiver and is used for a coherent lighting unit (e.g. inside a unit). If several receivers are required because of the arrangement of the units (e.g. in units set apart), one receiver must be ordered for each lighting unit. The foot switch is omitted when the radio remote control is used.

The radio remote control set consists of:

- 1 transmitter
- 1 receiver

Article	Remote control	Extra transmitter	Extra receiver
	Set for LED lamps		
Order no.	3333	3334	3335
	-	-	-

## IR repeater set

### IR repeater set

Infrared signal transmission set for operating media units behind wooden/high-gloss fronts. You can operate as many media units as you like in one compartment with one set. The following applies:

- At least 4 cm distance between unit and front
- One set must be used for each compartment
- The transmitter must be placed in the immediate vicinity of the receiver eye of the media unit
- High-frequency signals cannot be transmitted

The IR repeater set consists of:

- 1 receiver eye (ø 3.0 cm) incl. standing bracket (4.2 x 5.5 x 3.0 cm)
- 1 electric transmitter
- 1 plug EVG 12 V
- Cable clamps

Article	Infrared repeater set
	for lowboards (1 set per compartment)
Order no.	7777
	-

## Cable aperture assembly set

### Cable aperture assembly set

Cable aperture assembly set for fitting cable apertures on site in cover shelves, carcasses, centre partitions and rear walls in wood/lacquer/high-gloss lacquer versions. The cable aperture drill bit can be used with all standard power drills.

The cable aperture assembly set consists of:

- 1 cable aperture drill bit (Ø 60 mm)
- 3x cable aperture type K3 (aluminium colour)

Please be sure to follow the information and notes in the assembly instructions!

## Flatscreen TV sizes overview

### Flatscreen TV sizes overview

These schematic drawings are only for purposes of orientation as to how high and wide flatscreen TV's with different screen diagonal measurements are. The sizes depicted below are however only approximate and vary according to the manufacturer.

On the basis of the sizes you can estimate approximately how wide a lowboard for example has to be so that the flatscreen TV does not protrude at the sides.

## Flap hinge

### Flap hinge

If not otherwise marked in the type list, all the units with a flap have the flaps hinges at the bottom.

## Wall fitting

### Important notes:

Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15.

For other materials (please see next page) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used.

For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

### Further notes:

If 2 - 8 Raster (assembly) units are included as wall units, a maximum load per unit of 40 kg must not be exceeded for reasons of stability!

The wall units can only be fitted on absolutely solid walls. Light masonry is not suitable for this purpose.

If (assembly) units are stacked on top of one another, a wall bracket must be ordered for each stacked unit.

For each project please remember to leave a 2.0 cm gap at the top to be able to mount units.

## Maximum loads

### Maximum loads

Max. load of wooden and glass (fitted) shelves (up to 70.5 cm wide) and drawers: 25 kg

Max. load of wooden and glass (fitted) shelves (between 70.5 and 105.7 cm wide): 15 kg

Max. load of wooden and glass (fitted) shelves (from 105.7 cm wide): 10 kg

Max. load of cover shelves: 35 kg per metre length for floor units.

**Please also note any maximum loads which may be stated in the type list for the individual units!**

## Wall composition / assembly instruction

### Important notes:

The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place. Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete  $\geq$  C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

### Materials table

with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!			
Concrete C12/15 Compression strength $\geq$ 15 N/mm <sup>2</sup> 		Building bricks Mz 12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Solid blocks of light concrete V2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Limestone blocks KS 12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Perforated blocks of light concrete Hbl 2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Perforated sand lime bricks KSL12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Aerated concrete PP2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Vertically perforated bricks HLz 12 Compression strength $\geq$ 12 N/mm <sup>2</sup> Bulk density $\geq$ 1.0 kg/dm <sup>3</sup>		

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

## Mounting sets

### Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.

- 3 = 3 support boards  
4 = 4 support boards, etc.

One **assembly mortar set** is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.

**Important note:** Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard cartridge applicator tool which are the basic essentials for safe and clean workmanship.

### Standard set

The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.

### Assembly mortar set for up to a maximum of 3 support boards consisting of:

- 9x injection retaining sleeve
- 9x screw-in sleeve
- 1x injection cartridge
- 2x static mixer
- 1x assembly instructions

Please use the mounting screws from the standard set (supplied free of charge).

### Example of order:

- Add up number of support boards for all existing unit types
  - Divide the sum by “3”
  - Round up the result to a full number
- = Number of assembly mortar sets required
