now! sleeping PERFECT FOR SLEEPING AND CHILLING.

The key question when buying a bed: Boxspring or no Boxspring? The beds with a double portion of elasticity invite you to snuggle up, lounge or jump around and even have a chat. If you're not so keen on the super extra-strong springs of these cosy units, with now! sleeping you can simply drop quite classically into a fresh, beautifully designed bed – on a core composed of thousands of pocket springs or on soft cold foam, in textile, wood or lacquer, perfectly stylish and fitted out with all the extra comfort features.

Planning notes now! boxspring

Planning a bed

Planning step 1

Choice of boxspring bed

(with 7-zone cylinder pocket spring core and anti-slip top surface) in the required size and cover version

Notes: 100 to 140 cm wide boxspring beds consist of 1 box, boxspring beds from 160 cm width of 2 boxes. Please be sure to state clearly the version of the headboard incl. box in the order!

Planning step 2

Choice of legs

(set of 4 for 100 to 140 cm width or set of 8 from 160 cm width) in the required height

Note: Legs are absolutely essential for every boxspring bed.

Planning step 3

Choice of mattresses

in the required version (with 7-zone cylinder pocket spring core or 7-zone HR cold foam core), firmness level and in the matching dimensions

Planning step 4

Choice of optional Topper

in the required version (with Visco or comfort climate core) in the matching dimensions

Planning step 5

Choice of ancillary units

in the required size and version

Planning step 6

Choice of optional accessories for the ancillary units

such as:
- Cover shelf
- Glass shelf with LED lamps
- LED light strip

Boxspring bed heights

Total height:

The Boxspring beds have different total heights (from approx. 106.0 cm to approx. 115.0 cm). This height corresponds to the height of the boxspring headboards.

Surface height:

The surface height is calculated by adding the legs height, the box unit height, the mattress height and the topper height:

Height of desired legs = free space below the bed

Box unit height: approx. 20.0 cm

Mattress height: approx. 16.0 or 19.0 cm

Topper height: approx. 5.0 or 6.0 cm

This results in a minimum or maximum surface height of approx. 45.8 cm or approx. 63.7 cm!

Planning notes now! basic, now! no.14 and now! time

Planning a bed

Planning step 1

Choice of bed
in the required version and size

Please note: All beds with support slats for base frames and mattresses adjustable in height by 3.2 cm downwards and upwards (exception: now! basic beds).

Planning step 2

Choice of console / chest

Please note: now! time beds are delivered with standard round legs (as in illustration 1). They are also available with optional rectangular legs (no surcharge; as in illustration 2). Please state clearly in the order!

Please note: The now! no. 14 bed surround frame is split visually in the middle in lacquer versions (by V-shaped gap; see illustration), the bed surround frame is in one piece in wooden versions.

Please note: Please state all the versions clearly in the order!

Planning step 3

Choice of (optional) cover shelf
in the required version

Please note: now! time consoles incl. cover shelves. For now! time chests the cover shelves must be ordered separately, so that full-length cover shelves are also available for chests placed adjacently.

Please note: For now! no.14 the cover shelf is optional and can only be used for assembly units without a glass bonnet.

Planning step 4

Choice of optional accessories

such as:
- LED bed lamps
- LED light strip for console
- Glass shelf with LED lamps
- Further chests
