

# DREAM SLEEPING

# DREAM SLEEPING

The ergonomically shaped headboard featuring artificial leather piping and cleverly concealed indirect LED lighting makes reading in bed exceptionally comfortable. Natural oak features in the bed panel as well as in the cover surface of the consoles. High-gloss handles on the wardrobe and chests add brilliant highlights to the bedroom.

Ancillary unit interior carcasse standard melamine resin coated pure white, cover shelf of ancillary units standard in natural oak

Labelling in type list drawings / assembly notes for wall units

**Labelling in type list drawings / assembly notes for wall units**  
The majority of units have two wall mounting points (= number of base plates), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= base plates) is required, this is marked in the drawings in the type list with numbers in black boxes. Please be sure to note here the information and notes in the "Wall composition" chapter!

4

Notes on delivery

**Notes on delivery:**  
The majority of the units are delivered standard as **fully connected units (glued)** so that the carcasse **cannot be disassembled**. There are however some **exceptions** to this rule:

Some carcasses are delivered as complete units but can be **disassembled into individual sections** in the final customer's home. These types are marked with a **1** in the type list.

Some carcasses are delivered **in individual sections** because of their size. These types are marked with a **2** in the type list.

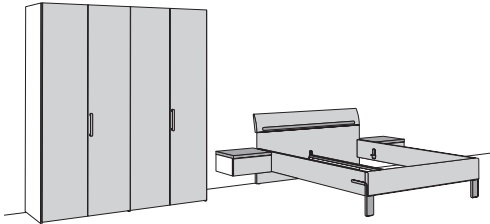

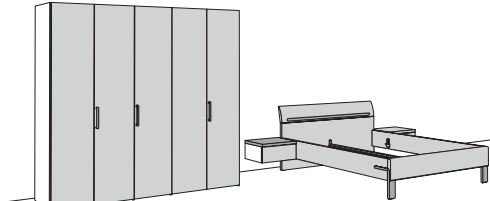

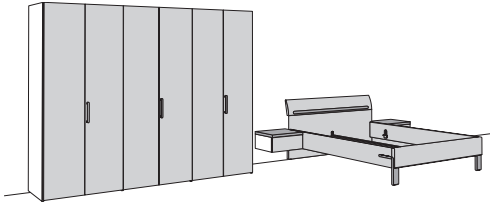

The fronts with the number **2** are delivered separately and can therefore always be (dis-) assembled.

Wall fitting

**Important notes:** Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15. For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

# Special combinations

Please also note the mattresses and base frames in the “Sleeping systems” type list!

Special combinations are arrangements that are reduced in price. This price advantage is only available when the arrangement is ordered exactly as described. The special combinations can be enhanced by including accessories. These are charged extra.					
Special combinations consisting of a bed unit (bed with two wall consoles) and a hinge-door wardrobe.					
The price of an entire special combination (bed unit and wardrobe) can be found in the grey shaded boxes!

## Notes on planning hinge-door wardrobes according to the endless assembly principle

Hinge-door wardrobes can be planned endlessly and combined with one another. Due to the various element widths one can create many total wardrobe widths. In this way the available floor space can be exploited to the full. For each wardrobe combination, the first element on the left is considered to be the basic unit, incorporating both outer side-sections. One can only include one basic unit in each combination. When adding on extension units, the right-hand side-section of the basic unit is employed as the end side-section of the complete combination. The graphics shown below give you an excerpt from our wardrobe assortment.

Standard interior fittings per unit: 2 fitted shelves, 1 clothes rod.  
All interior surfaces are melamine resin coated pure white.

## Wardrobe example

### 6-door hinge-door wardrobe 302 cm wide

## Dimensions

	Wardrobe height	Wardrobe height with passepartout
Heights incl. plinth:	229.6 cm	234.1 cm
Depths:	61.0 cm	61.0 cm
Widths:	see next page	

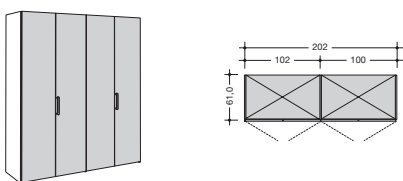

## Hinge-door wardrobes

- Hinge-door wardrobes can be planned endlessly and combined with one another
- With optional all-round passepartout
- Unit outside widths: 102 cm (basic units)  
50, 100 cm (extension units)
- Unit inside widths: 48, 98 cm
- Outside depth: 61.0 cm
- Inside depth: 56 cm
- Door opening angle: approx. 94°

# Wardrobes

As an alternative to planning an individual unit from the complete range there is the possibility of choosing from specially suggested wardrobes. This eases planning. Incorporating accessories can enhance the wardrobes. These are charged extra.

# Usable bed inside height and space under bed

## Note on usable bed inside height:

The support slats of the hülsta beds are delivered in the centre position, i.e. they can be adjusted by 3.2 cm upwards and downwards. If the slats are set in the lowest position, the **maximum usable bed inside height** is achieved.

In the case of some beds, the bed inside height is comparatively low. This means that mattresses in combination with base frames that are somewhat higher are not held so well by the bed side sections. Please note that the usable bed inside height of beds with height adjustable support slats is reduced when these are set higher.

This is how to calculate the individual height from the data supplied with the base frames:

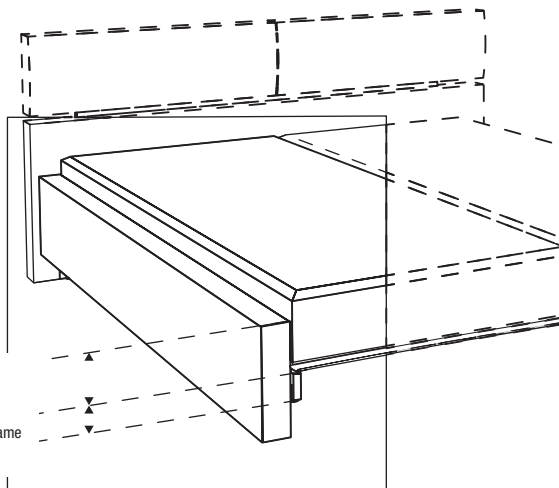

**Example: bed and hülsta flex basic B base frame**  
(back and foot sections adjustable)

**Max. usable bed inside height:**  
18.0 cm

approx. 12.5 cm for holding  
mattress

5.5 cm total height of base frame  
(example: hülsta flex basic B)

## Note on space under bed:

The storage space underneath the base frame is calculated from the bed height minus the usable bed inside height.

Example bed:  $42.2\text{ cm} - 18.0\text{ cm} = 24.2\text{ cm}$ .
